DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1, 3-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

It is unclear how "a first transistor (Q3) and a capacitor (C) for adding a modulating signal to said DC voltage and for selective allowing said DC voltage to supply said load".

It is noted in specification, page 7, lines 20-22, that "Transistor Q3, resistor R1 and capacitor C together provide the modulation of an alternating waveform from signal input 25 to a DC voltage from DC supply 21." Also, "transistors Q1-Q2, resistors R2-1R3 and diodes D1-D2 perform the switching function", wherein the switching function operable for selective allowing as claimed (see page 8, lines 1-23).

Accordingly, transistor Q3 and capacitor C **do not** have the functions of **adding** and **selective allowing** as claimed. The functions of **adding** and **selective allowing** are done by a mixing/switching as a whole.

Claims 3-6 are rejected because they depended on rejected claim 1.
